

YOU WON'T BELIEVE THIS ZERO LATITUDE PUTTER!

When Jack Hamm approaches the tee, few are prepared for what they're about to see. This guy, who looks more like a beach volleyball player than a golfer, approaches the ball with a rather unconventional stance-feet turned out, arm cocked awkwardly, but when this unusual swing uncoils, the power can be heard across the green. Jack Hamm is the **WORLD LONGEST DRIVER** with 6 World Records. Routinely soars his drives over 400 yards-100 yards longer than most PGA Tour players. Why isn't he winning \$3,000,000 a year on the tour? Once you see him putt you'll know the PGA tour is safe.

Jack Hamm is the WORLD'S WORST PUTTER. NOT ANY MORE!

Jack the Albert Einstein of sporting goods has invented a new putter that saving him 10 shots a round- the unbelievable revolutionary putter, Dr. FeelGood Zero Latitude Putter.

With this new design, there isn't a golfer out there that won't lower their score with Dr. FeelGood Zero Latitude Putter.

According to Jack all traditional putters have been designed the wrong way. Traditional putters are designed to work on the Y-Axis from math class, but the Putting Plane for putting is the X-Axis which is the latitude plane.

The Dr. FeelGood Putter is the 1st putter designed ever to work on the X-Axis which is the putting plane. It's designed to create the perfect plumb bob motion and actually plumb bobs its own line. It tracks its own line so there is zero deviation on the putting line.

This putter locks on the X-Axis, latitude plane creating the Zero Latitude Putter. If golfers can keep the putter straight in the putting plane, putting gets a whole lot easier.

This gives every golfer great putting feel. This is engineered putting! You're locked on to the perfect putting motion-the X-Axis latitude plane.

And now 4-foot putts are automatic gimmies. Can you make 10 putts in a row from 4 feet with your current putter? If you can't then you need to try Dr. FeelGood Zero Latitude Putter. If you can make a 4-foot putt every time, that can really lower your score.

If the Dr. FeelGood Putter can help Jack's putting, it can help everybody. Even PGA's recognized best putter ever Al Geiberger, Mr. 59 who holds the records for lowest PGA round ever 59, believes in the putter. Al is featured in the new infomercial Dr. FeelGood Zero Latitude Putter.

If your looking to cut some strokes off your golf game, you can call 888-550-LONG or go to Xfactor's website at www.xfactordirect.com

There's not a golfer out there that won't save some strokes on the green, with this new putter.
